

## **Mind Control via Cell Phone Towers**

The day is now approaching in which government mind control technologies will be directed at you, your neighbors, and your loved ones. Every single day, equipment is being erected and installed in this country with the hidden purpose of exerting mind control over the entire population. Everywhere in this country (and overseas), ELF/microwave transmission towers are being erected.

The antennae usually look like four slightly curved vertical plates about 2 feet in length and located in either 3 or 4 quadrants around the tower, two thirds up from the ground. Just look around, you'll see them. And you'll also notice more of them going up once you begin to pay attention. No one is saying anything, but you're expected to presume that they're for cell phones. (Do you really think that we need that much 'cell phone' transmission capability, every few blocks? Do you realize how very little energy is used by genuine cell phone usage? Yet these towers are capable of putting out levels of power that exceed cell phone requirements by a wide margin) These mind control technologies have been in place for a long time. It's not an accident that the frequency band chosen for cell phone use just happens to match the second order waves that Wilhelm Reich discovered in the late 1940's to effect thought transmission and allow the mind to be manipulated without the victim realizing it.

Reich worked on this project secretly for the CIA for over 5 years, from 1947-1952, until he realized who the CIA was planning to use the mind control on -the American people. He was outraged that he was deceived and used for such a treasonous motive and swore never to cooperate with the CIA, FDA, etc. again. Reich was murdered in Federal prison in 1957, just a few weeks before he was due to be released, having been in prison for 2 years on a trumped up charge leading to a contempt of court citation. He was reported to have had a 'heart attack'. He was strong as an ox. He was murdered two weeks before his parole board hearing. His last book, written in prison, was found to be 'missing' after his death and never returned to his family.

Don & Carol Croft, have found a method to disable these ELF towers from exerting their mind control functions by placing a simple device known as an orgone generator within a radius of 1,300 feet of these towers. Don has been documenting his nationwide efforts to neutralize the secret government's electronic mind control agenda along with their genocidal chemtrail program in his Adventures of Don & Carol Croft. I strongly urge you to read these journal entries, as they contain extremely powerful insights and techniques to overcome the tyranny and enslavement that we now face here in the world.

The first place these transmitters will be deployed is Glastonbury, Somerset. The effects of these transmitters, which entirely duplicate CIA research in optimal mind-control technology, are:

1. Destruction of short and long-term memory by disrupting calcium reflux from synapses, due to the effect of the 17.6 Hz ELF.
2. Disruption of synaptic neural networks, leading to behavioural and character changes
3. manic behaviour, followed by nervous exhaustion after use, or exposure
4. Disruption of higher brain function, leading to the so called 'zombification'
5. Enhanced suggestibility
6. The development of pre-cancerous cells, which can lead to long-term tumour growth
7. Effects on the Limbic System, leading to emotional and behavioural modification

8. ELF frequency in the TETRA system strongly affects calcium ions, causing them to efflux out of brain cells due to psychotron resonance.

Since these ions are the chief factor in long and short term potentiation of synapses, the braincell junctions, and are crucial to memory and cognition. Use of the TETRA system on such a scale could cause irreversible brain damage by disturbing not only calcium ions but sodium and potassium ions, all vital to nerve and brain function. The TETRA system will also flood the New York and London Underground, so commuters will regularly be exposed to behavioural modification during Rush Hour.
