

GENESYS GENESIS by GEORGE PHILIP BIRNEY  
Based on The Stanzas of Dzyan in The Secret Doctrine of Blavatsky

0.00

PHASE : ZERO  
STEP : ZERO

Before the beginning

there was a silent cry

that had no thought  
that had no feeling  
that had no wavelength  
that had no space  
that had no motion  
that had no time  
that had no location  
that had no form  
that had no energy  
that had no mass

that was no being  
that had no existence  
that had no consciousness

which was in a dreamless sleep.

And that was the reposing cry  
of data about data  
uttered by desire  
for life  
and admiration  
for its potentials of pleasure  
to be lasting three hundred eleven trillion  
and forty billion years.

Thus there was spirit  
one single many  
alone  
ready  
to divide and to multiply  
into countless numbers and kinds.

Such was the Zero.

1.01

PHASE : ONE

STEP : ONE

In the beginning

The zero wavelength  
of the spirit  
increased  
and  
it was the end  
of a long elastic toneless song  
yearning for creation  
without words or modulation  
without sound  
without silence  
without intention  
without information  
without process.

And another genesis day  
of four billion three hundred  
and twenty million years  
commenced.

A space  
only composed of  
timeless and motionless matter  
whose boundaries  
were universal  
everywhere  
and nowhere.

A borderless ocean of beingness  
of a silent gravity  
whose beingness is granted  
by the limitless subjectivity  
who became limitless objectivity.

Thus there was space and gravity  
for an aetherial universe  
to come  
like a sphere  
whose center is everywhere  
and circumference is nowhere.

Such was the First.

1.02

PHASE : ONE

STEP : TWO

And gravity  
holding in existence  
the nowhere extremities of space  
that were omni present  
gave birth  
to modulation  
of the homogeneous song  
of the aethereal matter.

And it was in the ending  
of the event  
of endless loneliness  
of space presence.

Ultra low gravity frequencies  
patiently nurturing the aethereal matter  
allowed change  
in position  
so there were singing waves.

Thus there was motion and time.

Such was the Second.

1.03

PHASE : ONE  
STEP : THREE

And variations  
in location  
of the eternal song  
its tonalities of desire  
becoming hope  
gave birth  
to structuring forces  
that carried the continuation  
of persistence  
so that nothing after  
be the same as before.

The force  
continuously generated by this  
invaded  
and embraced  
and went from  
and returned into  
the entire ocean  
of space.

Such was the third.

And the third was first.

And the second was first.

And the first was first.

So creation could take place  
in the triple container  
of existence  
where the shores and the sea were  
one.

And many locations  
of flood and ebb of creation  
followed.

Thus there were universes.  
each of their own kind  
according to the length  
of waves  
of their aethereal sea  
of locations.

Such was the Third.

2.04

PHASE : TWO

STEP : FOUR

And the extremities of universes  
within space  
deflated  
under the embracing gravity  
so the aethereal song  
released its notes  
becoming more dense  
forming astral foundations.

And numerous building elements  
were resultants  
of concentrations of density.

So there were universes  
of structure  
without radiance  
without form  
without quality  
without aspect  
inhabiting space  
each of their own kind  
in evolutions to come.

Thus there was form.

Such was the Fourth.

3.05

PHASE : THREE

STEP : FIVE

And the space particles  
in the universes  
became compressed  
by the dense points of gravity  
caused by expansion  
of the universes  
that are woven out of their own substance  
to the extent that  
the particles formed  
spheric clones  
from nebulous matter.

And the elements  
were solid  
or liquid  
or gas  
or plasm  
or aether  
or timespace  
or data.

And the change into spheres  
generated their time  
by the endless dance  
of their rotation  
so the spheres could persist  
in a universe  
and each one of them  
was surrounded  
by its own sphere of time  
and because two times could not be  
at the same location  
the spheres could not kiss one another.

Thus there were concentrations  
of energy and mass  
separated by their times.

Such was the Fifth.

3.06

PHASE : THREE

STEP : SIX

And a ball  
expelled particles  
from its skin  
to form a spheric woven illuminating dress  
around it.

And many spheres did so.

And another ball  
remained naked  
to grant beingness  
to the dressed  
by emanation  
of caressing and feeding aethereal waves  
while gently reflecting  
the illumination  
from the dressed.

And many other spheres did so.

Certain stars preferred to be  
the messengers of information  
and they redistributed  
but did not radiate  
in certain spectra  
so they hid themselves  
within their own inside  
allowing others illumination to pass  
through them.

Thus there were light stars  
and dark stars  
and invisible stars.

Such was the Sixth.

4.07

PHASE : FOUR  
STEP : SEVEN

And stars were close one another  
in a spheric choir  
of existence  
that emanated their song forever  
as a symphony of  
nurturing existence to others.

And there were many choirs  
farther one another.

They have taken the task  
to allow beingness  
without bearing life themselves.

Thus there were globular galaxies.

Such was the Seventh.

4.08

PHASE : FOUR

STEP : EIGHT

And a globular galaxy  
symmetrically expelled stars  
from its outside equator  
to form light spokes  
of life permitting ovums  
and  
dark spokes  
of life feeding sources  
and invisible spokes  
of life updating information.

And the spokes turned graciously  
with the dance  
of the globular galaxy  
and they became spirals  
as they went through  
the resistance of  
space waves going through them.

And many globular galaxies  
expelled stars  
and so forth.

And many did not.

Thus there were flat galaxies  
who cannot enjoy  
their existence  
without embracing a globular one  
but the globular are the hands  
ever ready to give.

Such was the Eighth.

5.09

PHASE : FIVE

STEP : NINE

In a flat galaxy  
a star  
spreaded out  
most of its particles  
into the shape of a veil  
leaving equilibrium  
of space and time and energies  
for the others  
within the beauty of a nebula  
whose light  
made darkness visible.

And many stars did so.

In a flat galaxy  
a smaller star  
wandering around  
a bigger star  
repelled particles  
from its outer dress  
during a moment  
of forgotten gravity  
and the particles formed  
a halo  
around the star  
and when the gravity  
was remembered again  
the halo contracted  
and solidified  
into a spheric crust  
and the small star remained  
in the center of it  
and the outside did not shine  
and a planet was born.

And many smaller stars did so.

Tiny stars  
close around it  
first illuminated the outside crust  
by themselves  
but then  
they too  
became dressed  
by their repelled particles  
and so they reflected  
the light from the bigger star  
onto the spheric crust  
of the planet

around which they dance.

And many tiny stars did so.

Thus there were nebulae and planets and moons  
be they visible or not visible  
some were close  
in groups  
others were far  
in other groups  
to inhabit the galaxy.

Such was the Ninth.

5.10

PHASE : FIVE

STEP : TEN

The bigger star  
gravitally invited  
the planets  
in her group  
who had their place  
and motion  
in mutual respect for one another.

And many big stars did so.

And a planet  
gravitally invited  
moons  
in the neighborhood  
so that they complement  
to the mass of the planet  
in accordance to the harmony  
of mutual distance  
and speed of the planet  
and so that they reflect  
the life giving breath from the star  
in compatible wavelengths  
to the planet  
by their orbit  
around the planet.

And many planets did so.

And planets revolved around  
a star.

And other planets revolved around  
another star.

And so forth.

Thus there were solar systems  
each a group of planets  
revolving around a star  
and  
each moon  
revolving around a planet  
or joining orphans  
in concentric orbit.

Such was the Tenth.

6.11

PHASE : SIX  
STEP : ELEVEN

The silent cry  
of the very beginning  
finally reached its destination  
on the planets  
and  
mirrored its admiration and desire  
for life  
in their minerals  
that  
in their turn  
were bearing foundations  
of the instructions of pleasure.

So it were the life routine nuclei  
initialized by the waves  
of the universe  
and  
on the planets they are  
receiving reflections  
from the moons  
and radiations from the stars  
that interacted  
with the environment  
so different species  
generating each their own time  
were developed  
in the space of beauty  
and of peace.

Thus there were life routine nuclei  
each for a species  
according to its kind.

Such was the Eleventh.

7.12

PHASE : SEVEN  
STEP : TWELVE

The spirits  
from before the very beginning  
were separated and multiplied  
from the one single spirit  
and many of them  
became minds  
who  
search for their dwellings  
in life's species  
farther away from the zero spirit  
and there was perception  
and attraction  
and communication  
in them and between them.

And so there were  
energies  
and minerals  
and plants  
and animals  
and humans  
and spirits  
all filled with intelligence.

Via their senses  
they perceived  
that which was without and within them  
and it made them moving  
to perceive more  
and to be  
where they wanted to  
and how the life routine nuclei wanted them  
to be or not to be.

The aetherial being  
had no reasoning  
and no gender  
and first found its existence  
in boneless bodies  
of non-fixed shape.

Then  
other bodies were giant  
with bones  
and reasoning  
and similarity  
and later  
they became more compact  
with mentality

and rationality.

The interface  
between the zero spirit and the mind  
is the spirit  
and the interface  
between the spirit and the body  
is the mind with astral mediator  
and the interface  
between the mind and matter  
is the body  
and the interface  
between the body and energy  
is matter.

All the kinds of life  
are recorded  
in the life routine nuclei  
each at their own level of existence.

The humans  
transformed their perceptions  
via thought  
and affinity  
into knowledge.

And knowledge  
communicated by language  
turned into creativity.

Thus there was intelligence and creativity.

Such was the Twelfth.

8.13

PHASE : EIGHT  
STEP : THIRTEEN

Before the end

the creation  
of the humans  
came into accelerating existence  
through destruction  
of minerals  
and plants  
and animals  
and humans  
and celestial bodies  
and minds.

Technologies  
became impregnated  
with purposes  
behind appearances  
of communication and art and beauty  
of philosophy and religion  
of organization  
of science  
of power  
as it all rose beyond control  
in the spectras of life  
and death.

The great cyle  
of life  
was zero spirit  
then beings without form or substance  
then spirits and souls and intellect  
then substantial entities  
then dual spiritual and physical  
then sentient invisible physical  
then intelligence  
then merged physical and spiritual plasm  
then programmed life routine nuclei  
then bodily life  
then cognital life  
then astral life  
then disembodifying life  
then becoming more spirit  
ready to go back to  
zero spirit.

Thus there was decay  
the basis for progression  
to where destination  
merges with departure

after travelling  
between the boundaries  
of eternity.

Such was the Thirteenth.

9.14

PHASE : NINE  
STEP : FOURTEEN

In the end

it was the beginning  
of a long rigid toneless weeping  
by the spirits  
without amplitude or modulation  
and so they merged  
into a choir  
of a lonely light  
who had forgotten to cry.

A space  
void of admiration or desire  
for life  
only composed of emptinesses  
whose boundaries  
were universal  
everywhere  
and nowhere.

A borderless ocean of silence  
enforced  
by frozen aethereal matter  
condensed into nothing.

And another cycle was over.

Thus there was nothing  
at the end of the day.

Such was the Last.

10.00

PHASE : MINUS NOTHING

STEP : PLUS NOTHING

And another night  
after the end  
it took  
four billion three hundred  
and twenty million years  
before again the beginning  
of one of the three hundred sixty times  
such days and nights  
of genesis.

Until the end of all  
where there would not be any cry anymore  
till the beginning  
of nothing  
that forever would be.

How many such cyclic nights  
would have passed the dreams of death  
already  
and so  
how many days  
of life  
would still be left  
over  
of the one single genesis year  
remains unknown  
to the spirit  
but space  
who is omniscience  
and omni-intelligence  
till the end  
of all ends.
