Dr. Piotr Bein holds a master's degree from the Technical University of Denmark and a doctorate in applied decision and risk analysis from the University of British Columbia. A member of the Institute for Risk Research, University of Waterloo, he served as a consultee on a recent report from the European Committee on Radiation Risk. His 30-year career of a licensed civil engineer, risk analyst, ecological economist, and researcher of socio-economic impacts of atmospheric change switched to an interest in information warfare after NATO attack on Yugoslavia.

Dr. Karen Parker received a Juris Doctor degree (honors) from the University of San Francisco School of Law and a Diplome (cum laude) from the International Institute of Human Rights (Strasbourg, France). Much of her work in her twenty-year career specializing in human rights and humanitarian law has been at the United Nations and Organization of American States human rights forums. In 1996 she found out about the use of DU weaponry in the Gulf War, and ever since has spoken up and written on the illegality of these weapons at the United Nations and elsewhere.
